MOBILE VIEW

LARGE VIEW

From top to bottom: The header contains div with text (maybe img?) and the nav bar; a background image spans across the entire header, including nav. Nav background is black translucent; links (home / poetry / about / resume / contact) are centered, white, with a circle img highlighting active link; sticky. Content in three divs of equal size side-by-side. Footer contains social media icons aligned left; contact info and copyright aligned right; sticky.

TABLET VIEW

From top to bottom: The header contains div with text (maybe img?) and the nav bar; a background image spans across the entire header (probably cropped differently from Large View), including nav. Nav background is black translucent; reads “navigation / active link”; click to expand full menu horizontally; sticky. Content in three divs spanning most of width of page. Footer contains social media icons aligned left; contact info and copyright aligned right; sticky.

MOBILE VIEW

From top to bottom: Body background img across whole page, fixed (cropped differently from Large View and Tablet View). Header contains div with text (maybe img?) and the nav bar; background black translucent. Nav background is black translucent; reads “navigation / active link”; click to expand full menu horizontally; sticky. Content in three divs spanning entire width of page; backgrounds black translucent. Footer contains social media icons, centered; stacked on contact and copyright info, centered; NOT sticky; background black translucent. Translucency will be higher in some parts and lower in others (always readable, but to give different visual weights to the page).
